Cypress 3.0: Global Embedded Systems Leadership

Market and Product Leadership

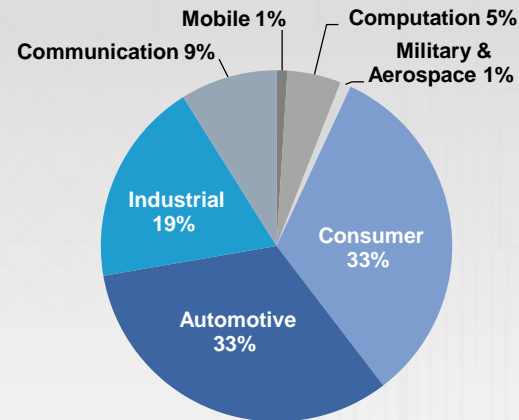

- No. 1: Automotive instrument cluster MCUs
- No. 1: USB-C controllers
- No. 1: SRAM & NOR Flash memories
- No. 2: USB solutions
- No. 3: Automotive MCU & memory
- Most widely deployed Wi-Fi/Bluetooth wireless connectivity solutions for the IoT
- The industry's best mixed-signal MCU solutions

Cypress 3.0: The Next Generation

- Sell solutions with wireless, MCU, memory, analog, & USB complete with software & tools
- Play in markets that matter where we can help our customers to make a difference
- Provide customers with a turnkey path to new products, new markets and new revenue
- Make our products easy to use, accelerating time to market and time to revenue

Cypress Q1 2017 Results

By End Market

By Solution

Q117 non-GAAP revenue: \$531.9M

IoT: Complete System Solutions With Wireless + MCUs

Cypress MCUs, connectivity, power management and memory solutions are critical for the IoT

- Cypress offers leading Wi-Fi / Bluetooth / BLE combo solutions
- Ultra-low-power, secure MCUs such as PSoC 6 are purpose-built for the IoT
- Complete software solutions such as the WICED SDK make getting connected fast & easy and accelerate time to market

IoT is the wireless connectivity piece of the Automotive, Industrial and Consumer end markets

¹ Source: ABI Research, Berg Insight, Global Semiconductor Alliance, Strategy Analytics, Broadcom/Cypress

Consumer: Focus on Connected Home

Cypress' MCUs, wireless solutions, analog and flash memories make getting connected fast and easy

- Broad portfolio of connectivity solutions offering Wi-Fi/Bluetooth/Zigbee/Thread and USB
- Low-power, high-reliability PSoC MCU solutions and software enable the fast and easy design of sensor-based systems that provide real-time updates on energy usage, lighting and home security, enhancing user convenience and safety
- Seamless connectivity with all major home automation platforms, including Apple's HomeKit, GoogleCast, Amazon's Alexa, and Cloud services such as AWS, Bluemix, Azure, Alibaba
- WICED software development platform, community, ecosystem and IP make getting connected fast and easy

Segment Focus: Smart Appliances

Cypress is a Top 5 supplier of solutions for air conditioners, stoves, refrigerators and other home appliances

Cypress' embedded systems solutions—including interface, sensor, wireless connectivity, control and display applications—have become a differentiating factor in a broad array of home appliances

HMI and Graphical Display

Hardware 2D graphics acceleration
CapSense-enabled buttons and rotary encoding
CapSense touchscreen control

Drum Vibration Analysis

System control

Liquid-Level Detection

Capacitive sensing

Water Pump Control

System control

Connectivity

Wi-Fi and Bluetooth for control, diagnostics, cloud applications and service

Inductive Door Lock

Analog sensing & control

Safety Features

Voltage/Current hardware monitoring
Water temperature sensing

Motor Control

Multi-function timers
Programmable pulse generation
Quadrature position/revolution counting

Cypress' Industry-Leading Portfolio of Embedded Solutions

Wireless radio standards and combinations + WICED SDK IoT platform

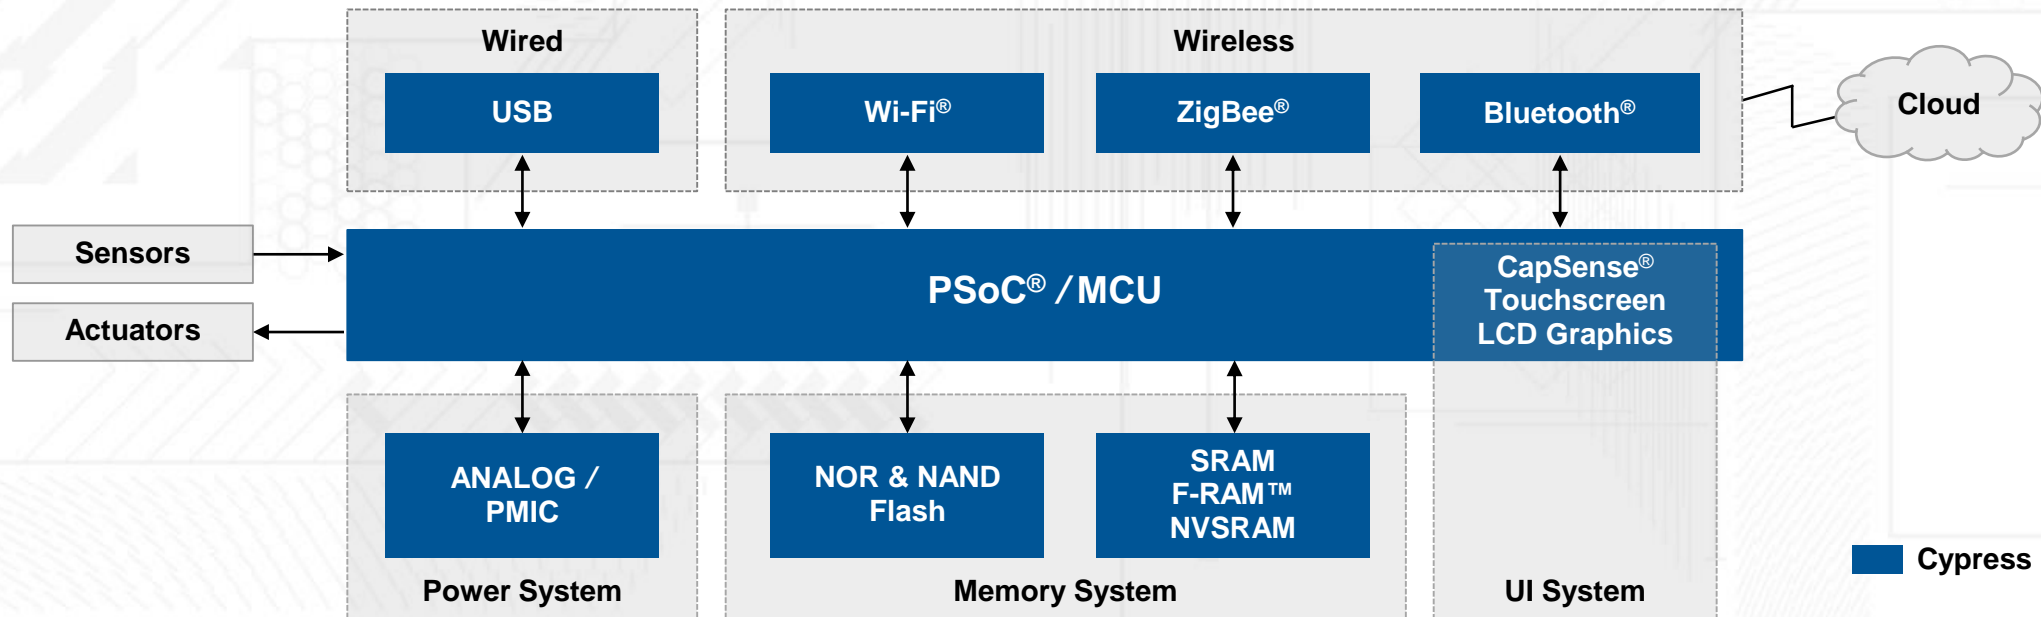

- Wi-Fi® (802.11ac, 802.11bgn), Bluetooth (BR, EDR, BLE), 802.15.4 (ZigBee®, Thread)
- Advanced coexistence algorithms for multi-radio (Wi-Fi + Bluetooth + 802.15.4) platforms

Broad portfolio of ARM®-based MCUs + revolutionary PSoC Creator™ IDE

- PSoC® 4: ARM Cortex® M0 and M0+ devices ideal for HMI, sensor hubs, and other mixed-signal sub-systems
- PSoC 6: Most-flexible, lowest-power, dual-core ARM Cortex®-M4 and M0+ MCU—purpose-built for the IoT

Complete portfolio of memories for embedded systems

- NOR Flash (program memory), SRAM (buffering), F-RAM™ (data logging), NAND (storage)

IoT Portfolio Roadmap

IoT	Full-Production Devices					2017			2018		
Product Feature						Q2	Q3	Q4	Q1	Q2	
BLE/BT/ 802.15.4 + MCU	 20736 BLE4.1 CM3 SoC	 20737 BLE4.1 Secure CM3 SoC	 20735 BLE4.2 CM4 SoC			 PSoC 6 BLE Low-Power BLE5.0 Dual Core, CapSense SoC  20719 Low-Power BT/BLE4.2 SoC  20729/39 BT/15.4 + MCU					
	 20706 BT4.2 SoC	 20707 BT4.2 HCI-UART	 20704 BT4.2 HCI-over- USB/UART								
Wi-Fi and/or BT Combo	 43569 2x2ac DB w/USB 867-Mbps, BT4.1	 43455 1x1ac DB 433- Mbps, BT4.2	 4354/6 2x2ac DB w/PCIe/SDIO 867-Mbps, BT4.1	 43596 2x2ac RSDB 867-Mbps, BT4.2							
	 43362 1x1n SB 72-Mbps	 43364 1x1n SB 96-Mbps	 4343W 1x1n SB 96- Mbps, BT4.1	 43438 1x1n SB 96- Mbps, BT4.1	 43340 1x1n DB 150- Mbps, BT4.0

Cypress has developed an extensive Partner Ecosystem and supports Wi-Fi and Wi-Fi Combo modules from our partners for all customer applications. Module details are available in [IoT Solutions Guide](#).

Wireless Protocols in The Home

Wi-Fi

De-facto Primary Home Network
Whole Home Audio Entertainment

Bluetooth-Bluetooth Low Energy

Music
Sensors

MESH- First application profile is lighting

HomeKit: Apple

Wi-Fi and BLE centric, offering bridging to other devices
iOS device controlled and uses Apple TV as your HUB for remote control

Siri enabled

Zigbee/Thread

802.15.4 Mesh and low power sensors

Zigbee Light Link – Hue...

Zigbee established footprint in the home with Cable & Sat service providers for sensors

Expanding Wi-Fi: The Backbone of IoT Ecosystem

11ac Smartphones and Infrastructure

Infrastructure and Notebooks/PCs

Smartphones and Tablets

Digital TVs

What's Next ...

Everything Else

802.11ac Key Benefits

Faster Throughput

Faster downloads and higher quality video streaming to phone, tablet, or DTVs

High Capacity

Simultaneously connect to multiple devices on the home network

Better Coverage

Fewer dead spots throughout the home

Battery Life

Go longer without charging your device

802.11ac Networking Enhancements

5 GHz Spectrum

More channels and less interference

**80 MHz Bandwidths
256QAM**

Faster connection rates

**Dynamic Channel
Management**

**Efficiency improvements for network
throughput and capacity**

**Standardized
Beam-forming**

Improved performance over range

Why 11ac Benefits IOT Applications

- **The Industrial IoT needs 11AC:**

- More robust, more reliable connections with latest security standards
- Enterprise infrastructure is AC, so network throughput is benefited
- Beamforming for enhanced range
- Node density benefits from transmission speeds which allow for shorter on-air time and cleaner air.

- **Home and Consumer IoT needs 11AC:**

- Dual-band for mixed solutions with Audio/Video entertainment and data
- Beamforming for enhanced range
- Better coexistence with crowded 2.4 GHz band and BT/BLE devices
- Improved network performance for multiple users

CYW43455: Multi-Radio, Wireless Connectivity For IoT

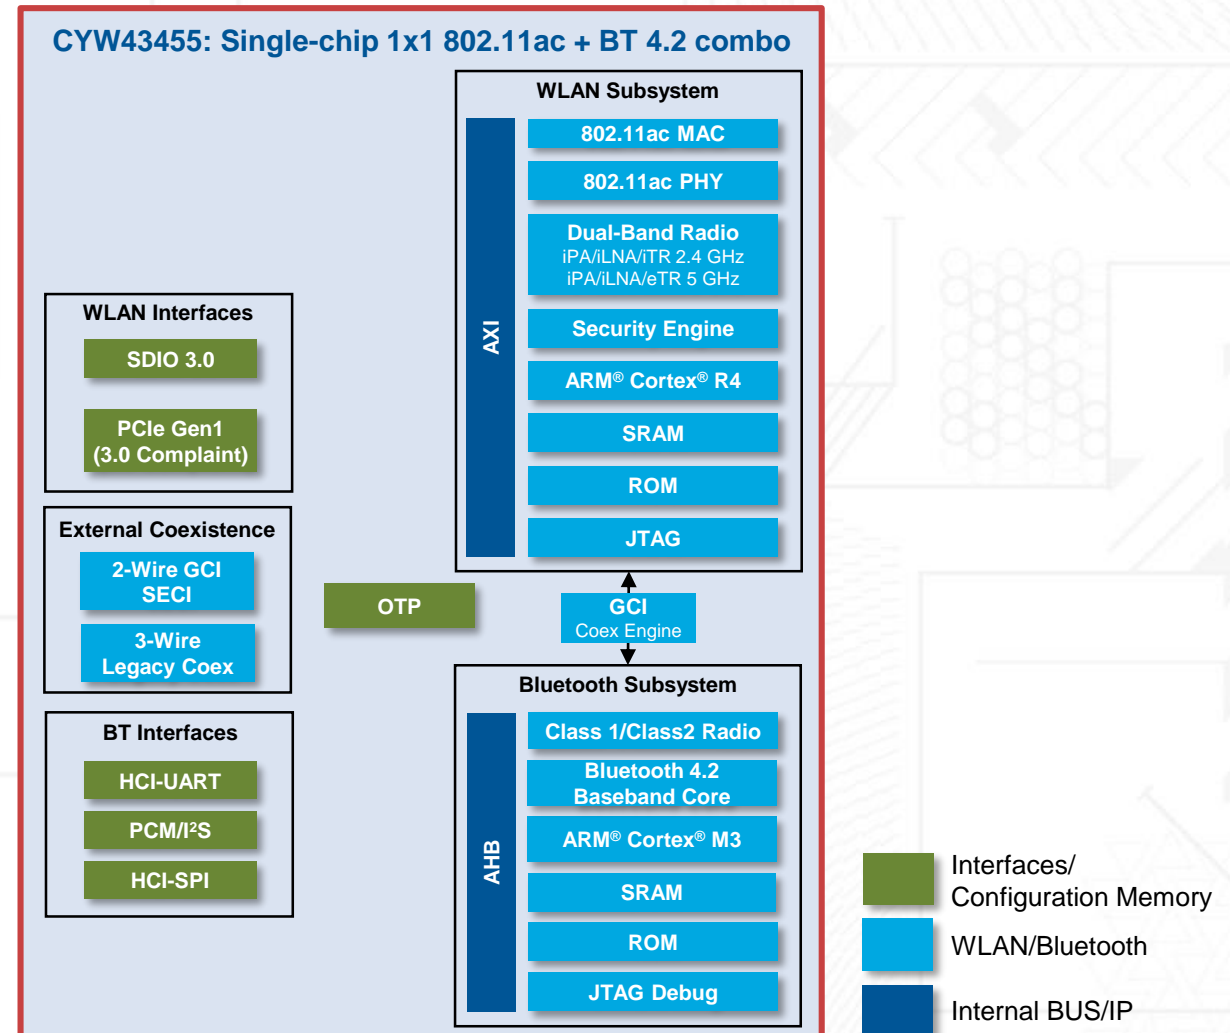

■ High-performance Wi-Fi

- 802.11ac MAC/PHY with 256-QAM
- Legacy 802.11a/b/g/n/ compatible
- 20/40/80 MHz channels
- 1x1 with up to 433.3 Mbps PHY data rates
- Dual-band (2.4 GHz/5 GHz) radio

■ Dual-Mode Bluetooth

- Bluetooth 4.2 complaint
- Basic Rate + Enhanced Data Rate + Bluetooth Low Energy
- Class 1 or Class 2 transmitter
- HCI-UART/SPI or PCM/I²S for audio

■ Advanced coexistence engine for optimum wireless performance

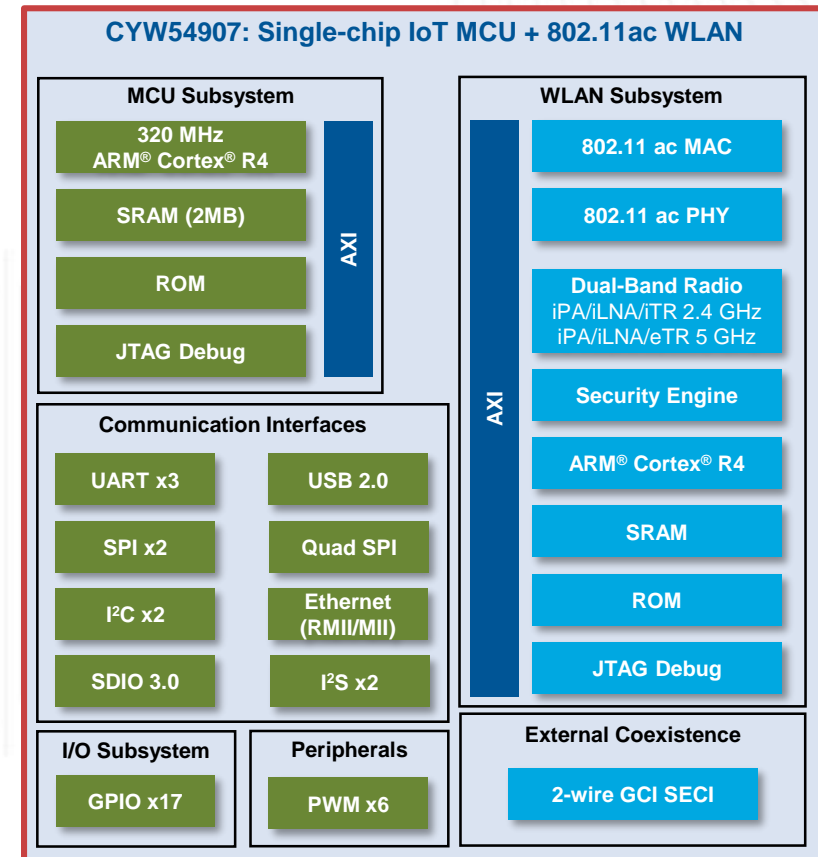

CYW54907: Complete System-on-Chip For IoT

Advanced Wi-Fi Connectivity

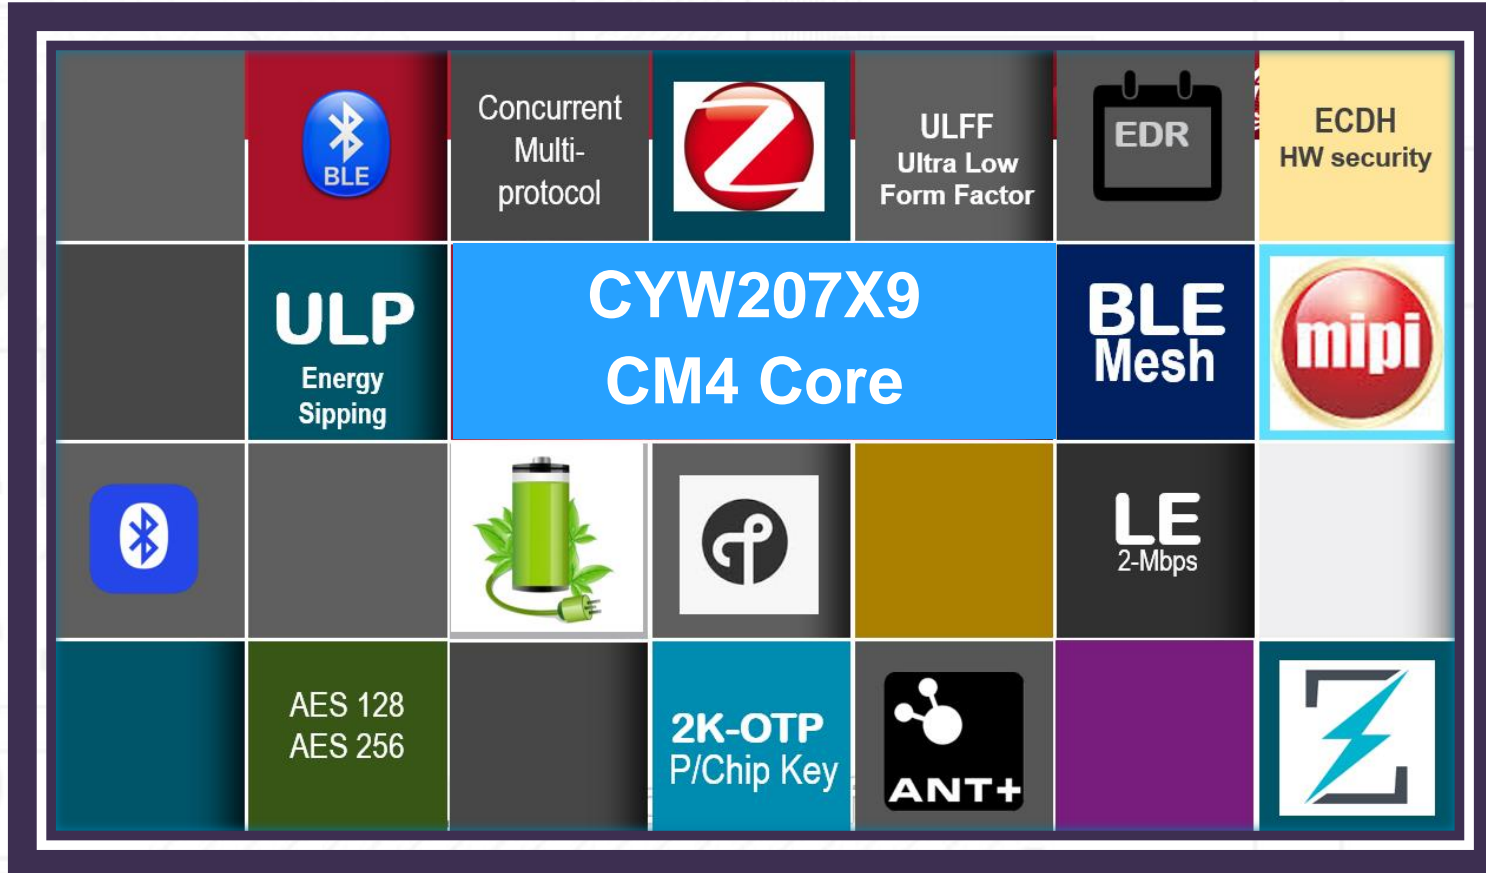

- 802.11ac MAC/PHY with 256-QAM
- Legacy 802.11a/b/g/n/ compatible
- 20/40/80 MHz channels
- 1x1 with up to 433.3 Mbps PHY data rates
- Dual-band (2.4 GHz/5 GHz) radio

High-performance applications processor

- 320 MHz Cortex R4 with 2 MB SRAM for code/data
- Quad-SPI flash interface with 40 Mbps transfer rate
- On-chip ROM with IPV6 network stack
- Dedication fractional PLL for audio clock
- Easy-to-use WICED SDK for development
- Rich set of peripheral/interfaces – USB 2.0, SDIO 3.0, RMII/MII etc.

CYW207X9 - Multi-protocol ULP SoC for Smart Home & Wearables

- **Ultra Low Power**
 - < 5.5/5.7mA Tx/Rx LE @0dBm
 - < 8.9mA Tx/Rx 0dBm @15.4
 - < 8uA 1s LE beacon
- **Multi-protocol**
 - BLE 4.2 → 5.0
 - LE 2Mbps
 - BT 4.2 + EDR
 - Zigbee/Thread
 - ANT+
 - Concurrent BT + LE + 15.4
- **Peripheral Interfaces**
 - Q-SPI, SPI, I2C, UART
 - MIPI-DBI-C
 - I2S, PDM
- **Security**
 - AES128, AES256, ECDH
 - Secure Flash (Non-probe)
 - OTP (per chip security)

Cover home automation, security, & wearables

Enable rich and diverse smart home use cases

CYW20719

High-Performance Bluetooth MCU w/Security

Applications

Medical, home automation, wearables, POS, audio

Features

- **Bluetooth v4.2, Basic Rate + Bluetooth Low Energy**
 - Industry's most widely deployed Bluetooth stack
 - Industry's lowest-power radio
 - Proprietary low-energy audio (LE Audio) support
 - 2-Mbps proprietary BLE support
 - Secure over-the-air (OTA) firmware upgrade
 - RSA, X.509, SHA, AES128
- **MCU Subsystem**
 - 96-MHz Cortex®-M4
 - 512KB SRAM, 1MB Flash
- **Packages**
 - 40-pin QFN (5 x 5 mm)
 - 80-ball WLCSP (2.2 x 2.2 mm)
- **Supported in WICED STUDIO**

WICED Studio 5.x: The SDK for IoT

To Develop an IoT Application, You Need an SDK that:

Integrates multiple wireless technologies

Includes support for necessary protocols

Enables interoperability with the existing ecosystem

Offers connectivity to leading cloud services

SOFTWARE DEVELOPMENT KIT

Wireless Internet Connectivity for Embedded Devices

WICED Studio is the only SDK that provides all the above and enables ease-of-use

Our Global Partner Ecosystem to Enable IoT

A global partner ecosystem enables you to get the level of support you need

Cypress MCU Portfolio

¹ A programmable analog block that is configured using PSoC software to create analog front ends, signal conditioning circuits with opamps and filters

² A programmable digital block that is configured using PSoC software to implement custom digital peripherals and glue logic

PSoC 4 S-Series Enables Reliable Capacitive-Sensing

- **Cypress's fourth-generation, low-power CapSense solution**
 - Up to 56 CapSense I/Os with an average current consumption of 3 μ A per sensor
 - SNR >300:1 to deliver robust noise immunity and [Liquid Tolerance](#)
 - Mutual-capacitance sensing¹ to implement advanced features like liquid-level sensing²
 - SmartSense Auto-tuning³ to reduce time-to-market and increase manufacturing robustness

Touch Buttons: 2003

LG Chocolate
(First Generation)

Cypress's CapSense begins with buttons and sliders

Liquid Tolerance: 2008

Whirlpool Dishwasher
(Second Generation)

Liquid Tolerance, [Proximity Sensing](#) and improved noise immunity

SmartSense: 2010

HP TouchSmart Printer
(Third Generation)

Remove manual tuning with SmartSense™ Auto-tuning

1B Units Shipped: 2013

Samsung Galaxy Note 3
(Third Generation)

One billionth CapSense controller shipped with stylus-activated buttons

PSoC 4 S-Series: 2016

PSoC 4 S-Series
(Fourth Generation)

Superior touch-sensing performance with low power consumption

CapSense is No. 1 solution in sales with over 1 billion units in the field

¹ A capacitive-sensing method that drives a current on a transmit pin and measures the charge on a receive pin; typically used in systems with a large number of closely spaced capacitive sensors

² A method to detect liquid-level height using capacitive sensors

³ A Cypress algorithm that automatically sets and maintains parameters to optimize performance and to continuously compensate for system, manufacturing and environmental changes

PSoC 6: Purpose-Built for the IoT

Emerging IoT devices require increased processing and security without a power and cost penalty

- Cypress's [PSoC 6](#) portfolio bridges the gap between application processors and standard microcontrollers
 - Dual-core ARM® Cortex®-M4 and ARM Cortex®-M0+, running at 150-MHz and 100-MHz, ultra-low-power 40nm architecture
 - Industry-leading ultra-low-power design that consumes as little as 22- μ A/MHz in active power mode¹ and 4.5- μ A in deep sleep modes
 - Best-in-class flexibility with wired and wireless connectivity options, software defined peripherals and industry-leading [CapSense®](#)
 - Integrated, hardware-based Trusted Execution Environment (TEE) with secure data storage
